Primary Examiner
Art Unit 3622

Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: The Applicant discussed how the invention differed from the references, specifically how the device was not providing information sufficient to identify the user. The Examiner noted that Stewart disclosed the remote device only transmitting its ID information and no information pertaining to the identity of the user. It was agreed to change the claims to clarify that the system could not use the remote device ID to correlate the device to a specific user. Likewise, it was agreed to change Claim 24 to indicate that future use of the URL by the user was being disabled, not just access to the URL itself. The Examiner indicated that these changes would probably overcome the cited art, but that further review and possible future searching for these specific limitations would be required..
